

CARGO TIE-DOWN D-RINGS

When it comes to safely securing cargo, D-ring tie-downs may be small, but they're an essential piece of hardware. Engineered for strength and durability, these D-rings provide reliable anchor points for straps, chains, bungees, and ropes—ensuring your load stays secure during transport. Ideal for trailers, trucks, flatbeds, utility vehicles, and industrial equipment, they deliver the safety and dependability required for demanding applications.

Key Benefits:

- » Rated from 12,000 to 47,000 lbs. Minimum Breaking Strength (MBS) to handle a range of applications.
- » Designed with heavy-duty forged steel construction for consistent performance and long-term reliability in demanding applications.
- » Unplated steel for welding or zinc-plated steel for corrosion-resistant bolt-on applications.
- » Weld-on options feature factory pre-beveled for improved weld penetration and ease of installation.

Part #LR-0500-R1-B01-ZN
1/2" Zinc Bolt On
12,000 lbs MBS

Part #LR-0500-R1-FC1
1/2" Weld On
12,000 lbs MBS

Part #LR-0625-R1-FC1
5/8" Weld On
18,000 lbs MBS

Part #LR-0750-R1-FC1
3/4" Weld On
26,500 lbs MBS

Part #LR-1000-R1-FC1
1" Weld On
47,000 lbs MBS

Part #LR-1000-BR1-FC1
1" Bent Weld On - 22.5 degree
47,000 lbs MBS
